23. Problem: (use additional Sheets if necessary)
Subscription Database was not organized enough to prevent problems from arising

(This DUE is for possible incorporation into the M&O baseline and is available for use at other DAACs.)

24. Proposed Solution: (use additional sheets if necessary)
A Perl/TK GUI tool to help manage subscriptions. It answers the question - Who should be getting data but is not? and vice versa. T It compares GDAAC_SUBSCRIPTIONS.xls with the subscription database. The Excel file shows who SHOULD be getting data. This tool looks at the subscription database from the point of view of this Excel file. It shows clearly who should be getting data but is not. It shows who should not be getting data but is, as well as details of all of these subscriptions. It has many additional features which merits it the name Subscription Center
