920-TDL-002, 920-TDL-002, 910-TDA-005,910-TDA-003 [illegible]		

19. Release Affected by this Change:	20. Date due to Customer:	21. Estimated Cost:
5B		None - Under 100K

22. Source Reference: ☒NCR (attach) ☐Action Item ☐Tech Ref. ☐GSFC ☒Other:
[illegible]

23. Problem: (use additional Sheets if necessary)
Additional IRIX 6.5 Baseline updates are required. See attached pages.
Redelivery of Irix 6.5 distribution is needed due to [illegible] ECSed 27[illegible]

24. Proposed Solution: (use additional sheets if necessary)
Update the baseline to reflect identified IRIX 6.5 Transition changes.
Redeliver IRIX 6.5 distributions.

25. Alternate Solution: (use additional sheets if necessary)
Inaccurate baseline.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Inaccurate baseline

27. Justification for Emergency (If Block 15 is "Emergency"):

28. Site(s) Affected: ☐EDF ☒PVC ☒VATC ☒EDC ☒GSFC ☒LaRC ☒NSIDC ☐SMC ☐AK ☐JPL ☐EOC ☐IDG Test Cell ☐Other

CCR #: 00-0793 **Rev:** A **Originator:** Maryellen Corbett

Telephone: 0703 **Office:** SE COTS

Title of Change: Additional IRIX 6.5 Baseline Changes - Revision A to CCR 00-0793

1. Per Attachment #1, Update the HW/SW maps so that the SGI hosts highlighted are baselined for BDS, HiPPI SW and HiPPI adapter firmware. This software/firmware group should always appear together or not at all. BDS is currently listed for some NSIDC SGI hosts and should be removed, as HiPPI is not implemented at this site on any SGI hosts. HiPPI is not implemented on any AQG hosts at any site. LARC's l0icg hosts will also include this software/firmware when IRIX 6.5 hardware movement is completed, but not currently.
2. Per Attachment #2, add the COTS software to the HW/SW map baselines for Console1 and Console 2 hosts previously added to the HW-SW maps.
3. Per Attachment #3 mark-up to 910-TDA-003 (COTS Version Baseline), add IRIS Console, version 2.0 to COTS Version Baseline.
4. Per Attachment #4 mark-up to 920-TDE-002, change the software baseline for e0drg05, which will retain it's curent name, but will change it's function to a secondary WKG host. New software baseline reflects this functionality.
5. Per Attachment #5 mark-up to 920-TDL-002, add the software baseline for previously baselined IRIX 6.5 new host: l0spg10.
6. COTS products DBTools.h++, Tools.h++, ToolsPro, BX/Epak, and HDF are no longer delivered as separate COTS products, as they are currently delivered with the Custom Code. Although these products, should be baselined on the COTS version map, they should not be directly linked to specific hosts as they were in the past when dymanically linked and delivered as separate COTS products. Links to specific DAAC, PVC and VATC machines should be removed as individually linked COTS products as this could cause unintended and inappropriate audit findings.
7. Per Attachment #6, red-lines for Site-Host Map.

CM01AJA00

********** Problem **********
Long Description :

Problem:
There is a discrepancy between the published documentation (914-TDA-140) and th e distribution script mkdist.sh in the specification of one of the required CDs for IRIX 6.5.6. The mkdist.sh script specifies 812-0665-004 (CD for DG SCSI&FC RAID 3.2), and the proper CD is 812-0665-005 (CD for DG SCSI&FC RAID 3.3). Kev

in Lange has already been informed of this and fixed the problem, but Tamita Watkins asked that I submit this trouble ticket to facilitate the distribution of the new tar file.

Impact:
If this is not fixed, it is possible that people will load the wrong version of the RAID code.
<< end of description >>

********** Analysis **********
Please describe your Analysis:
Script was modified and re-sent to DAACS.

********** Resolution **********
Please describe your resolution to this problem:
Fixed error in script file that displayed that wrong CD number.

From: Maryellen Corbett

Subject: Additional 6.5 Baseline revisions under CCR 00-0793 A

Date: September 05, 2000

Attachment 2

For all **Console1** and **Console2** hosts previously added to the baseline, add the following COTS products at the versions previously baselined for these products on the IRIX 6.5 baseline.

- IRISConsole
- IRIX
- Anlpassword
- TCP Wrappers
- Secure Shell
- Tripwire
- Legato Client
