23. Problem: (use additional Sheets if necessary)
The attached ticket (EN_6B_03) which describes the requirements and verification criteria for Results Set Chunking was revised to correct the Level 4 requirements. The L4 requirements should state that the SDSRV CI needs to perform output chunking on the searched and inspected granule data, but not on the granule list itself.

24. Proposed Solution: (use additional sheets if necessary)
Incorporate the revised ticket to the VDB. Revision involves deletion of one Level 4 requirement (S-DSS-06762), and relevant updates in the "Con Ops" section and the L4 mapping tables.

25. Alternate Solution: (use additional sheets if necessary)

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Baseline will not reflect current design activities.
