Notes: All the ESDTs are updateable. To update the ESDTs, the SDSRV needs to be killed and brought up in maintenance mode or the ESDT can also be updated by running the following script:

EcDsUpdateESDTStart <MODE> <descriptor file name>

It is not necessary to bring the SDSRV in maintenance mode when you use the script. Look at the EcDsUpdateESDT.ALOG file for any error messages.

5. Using the STMGT GUI add new Volume Groups as well for the ESDTs, if necessary
