24. Description of Change: (use additional Sheets if necessary)
The EDF Integration Lab databases have had several occurences of the wrong database being referenced by the dbo login which caused a loss of data and recovery time to correct. The dbo login for EDF Integration Lab databases should be separately named and controlled by the lab leads and not used by the developers. The DEV02 databases are not being correctly used by the DEV02 mode.

25. Proposed Solution: (use additional sheets if necessary)
Stop using the DEV01 databases and begin using the DEV02 databases (see attached database list for database corrections).
Change the dbo login for EDF DEV02 Integration Lab databases per the attached list.
Remove the old dbo login from the listed databases as a user or owner.

26. Alternate Solution: (use additional sheets if necessary)
None.

27. Consequences if Change(s) are not approved: (use additional sheets if necessary)
The EDF Integration Lab databases can accidently be corrupted by development staff.

28. Justification for Emergency (If Block 15 is "Emergency"):
