24. Description of Change: (use additional Sheets if necessary) This software distribution includes replacement binaries for the AutoSys Xpert GUIs – TimeScope, JobScope and HostScope. These GUIs monitor the progress of jobs (DPRs) through AutoSys. Instructions for upgrading AutoSys from 3.3.7 to 3.4.2 and to reconfigure AutoSys to remove the High Availability setup were previously sent to the DAACs (PSR 914-TDA-083). It was discovered that the JobScope GUI was defective and 3.3.7 binaries for JobScope and the other GUIs were shipped in place of the 3.4.2 binaries. ECS is now distributing 3.4.2 versions of the GUI binaries that have been fixed by the vendor. Deliver new sendwrapper to fix NCR 23081.						
25. Proposed Solution: (use additional sheets if necessary) Install the 3.4.2 AutoSys/Xperry Binaries (hostscope , jobscope and timescape) and Custom sendevent Wrapper						
26. Alternate Solution: (use additional sheets if necessary) None						
27. Consequences if Change(s) are not approved: (use additional sheets if necessary) Jobscape will continue to core-dump. Operators will have to continue restarting the JobScope GUI, possibly losing setup information that was used with the GUI. Autosys will continue to allow two copies of a job to run, causing database corruption
