24. Description of Change: (use additional Sheets if necessary) This Patch is latest version of DCE 1.1.C rollup #3 and libc Rollup 3771 has many bug fixes. SGI has suggested to install this . as a possible fix for some of the application core dumps on SGI. (Eg. NCR 24122). and Random core dumps of subagents in Func. Lab						
25. Proposed Solution: (use additional sheets if necessary) Install on IDG cell (drpepper) and test normal IDG test drivers to verify that it does not cause problems. Later this needs to be installed on Func. Lab and to be monitored to check core dumps are fixed or not. Patches are available in lemmings at /data0/CM_INBOX						
26. Alternate Solution: (use additional sheets if necessary) NONE						
27. Consequences if Change(s) are not approved: (use additional sheets if necessary) Our current DCE rollup #2 and we will miss lot of bug fixes available in Roll # 3. Also our Random core dumps on LAB may get fixed by this patch.						
28. Justification for Emergency (If Block 15 is "Emergency"): Installing these patches and monitoring for core dumps in Lab as soon as possible, since this needs to released to DAACs if these patches fix core dump problem.
